

Product Specifications – ANESPA

Your Home Spa System

The exclusive ANESPA Home Spa System transforms your ordinary bathroom into a natural hot spring resort. ANESPA produces a continuous stream of healthy ionized mineral water. It removes chlorine and other harmful substances in your tap water, and adds safe, moisturizing minerals that are healthy for your skin and hair. Enjoy a lovely shower or bath in ANESPA hot spring water!

Generates: Mineral Ion Water

Product Specifications

Model name / number	Anespa / ANSP-01
Water source connection	Water supply plug closed type
Power Supply	N/A
Power consumption	N/A
System	Mineral ion water activator
Production rate (gallon(s)/minute)	2.6-4.0
Level Selections	N/A
Electrolysis Capability (continuous use)	N/A
Cell cleaning method	N/A
Applicable water quality and pressure	N/A

Electrolysis Enhancer	N/A
Enhancer Refilling	N/A
Protector	Water Limiter
Electrode material	N/A
Electrode plates	0

The Water Filter

The ANESPA contains a blend of natural hot spring ingredients and minerals that makes the water slightly alkaline and very relaxing!

A mineral stone taken directly from the Futamata Radium Hot spring in Hokkaido, Japan. This stone gives the water the same gentle and relaxing effect of a hot spring.

MIC stone

Generates activated mildly alkaline water which is good for your skin.

Power stone

Generates strong negative-ions.

How the ANESPA Creates Mineral Ion Water.

The first task is to filter out harmful components of the water: chlorine, trihalomethanes, phenols, sediment, odor, taste, and organic waste. Enagic's water makers achieve this by the use of a multistage activated carbon filter containing antibacterial granular activated carbon and Calcium Sulfite.

2. Neodymium magnet

This high quality magnet can decompose the water molecules into smaller clusters to activate the water and change the water to slightly stimulated water. At the same time, it helps the water to better absorb minerals.

3. Ceramic cartridge

The cartridge has a layer of ceramic filling. The layer of ceramic filling is about 3 times thicker than other products on the market. Ceramic balls of both Futumata Radium Hot spring and Chikutan are comfortably filled in a single cartridge.

4. Relaxing water

The ANESPA creates abundant flow of hot water; 15 liters per minute (~4 gallons/minute). The massaging shower head adds to the relaxing effect.
